

LIVE WEBINAR · APR 29, 2026 · 12 PM ET

The Modern AI Excel Stack

for Finance & Accounting

- The SAFE Framework for AI decisions
- Power Query · Copilot · Office Scripts
- Live demos on real finance data
- Recording available to members

George Mount

Microsoft MVP · O'Reilly Author · LinkedIn Learning

AI is everywhere in Excel now.

Which tools actually help?

And which ones quietly introduce risk into your financial models, reports,
and close process?

Let's cut through the hype.

INSIDE THE SESSION

The SAFE Framework

A four-question lens for deciding when AI helps — and when it introduces risk you can't afford.

Stakes

How bad is wrong?

Auditability

Can you trace it?

Frequency

One-off or recurring?

Expertise

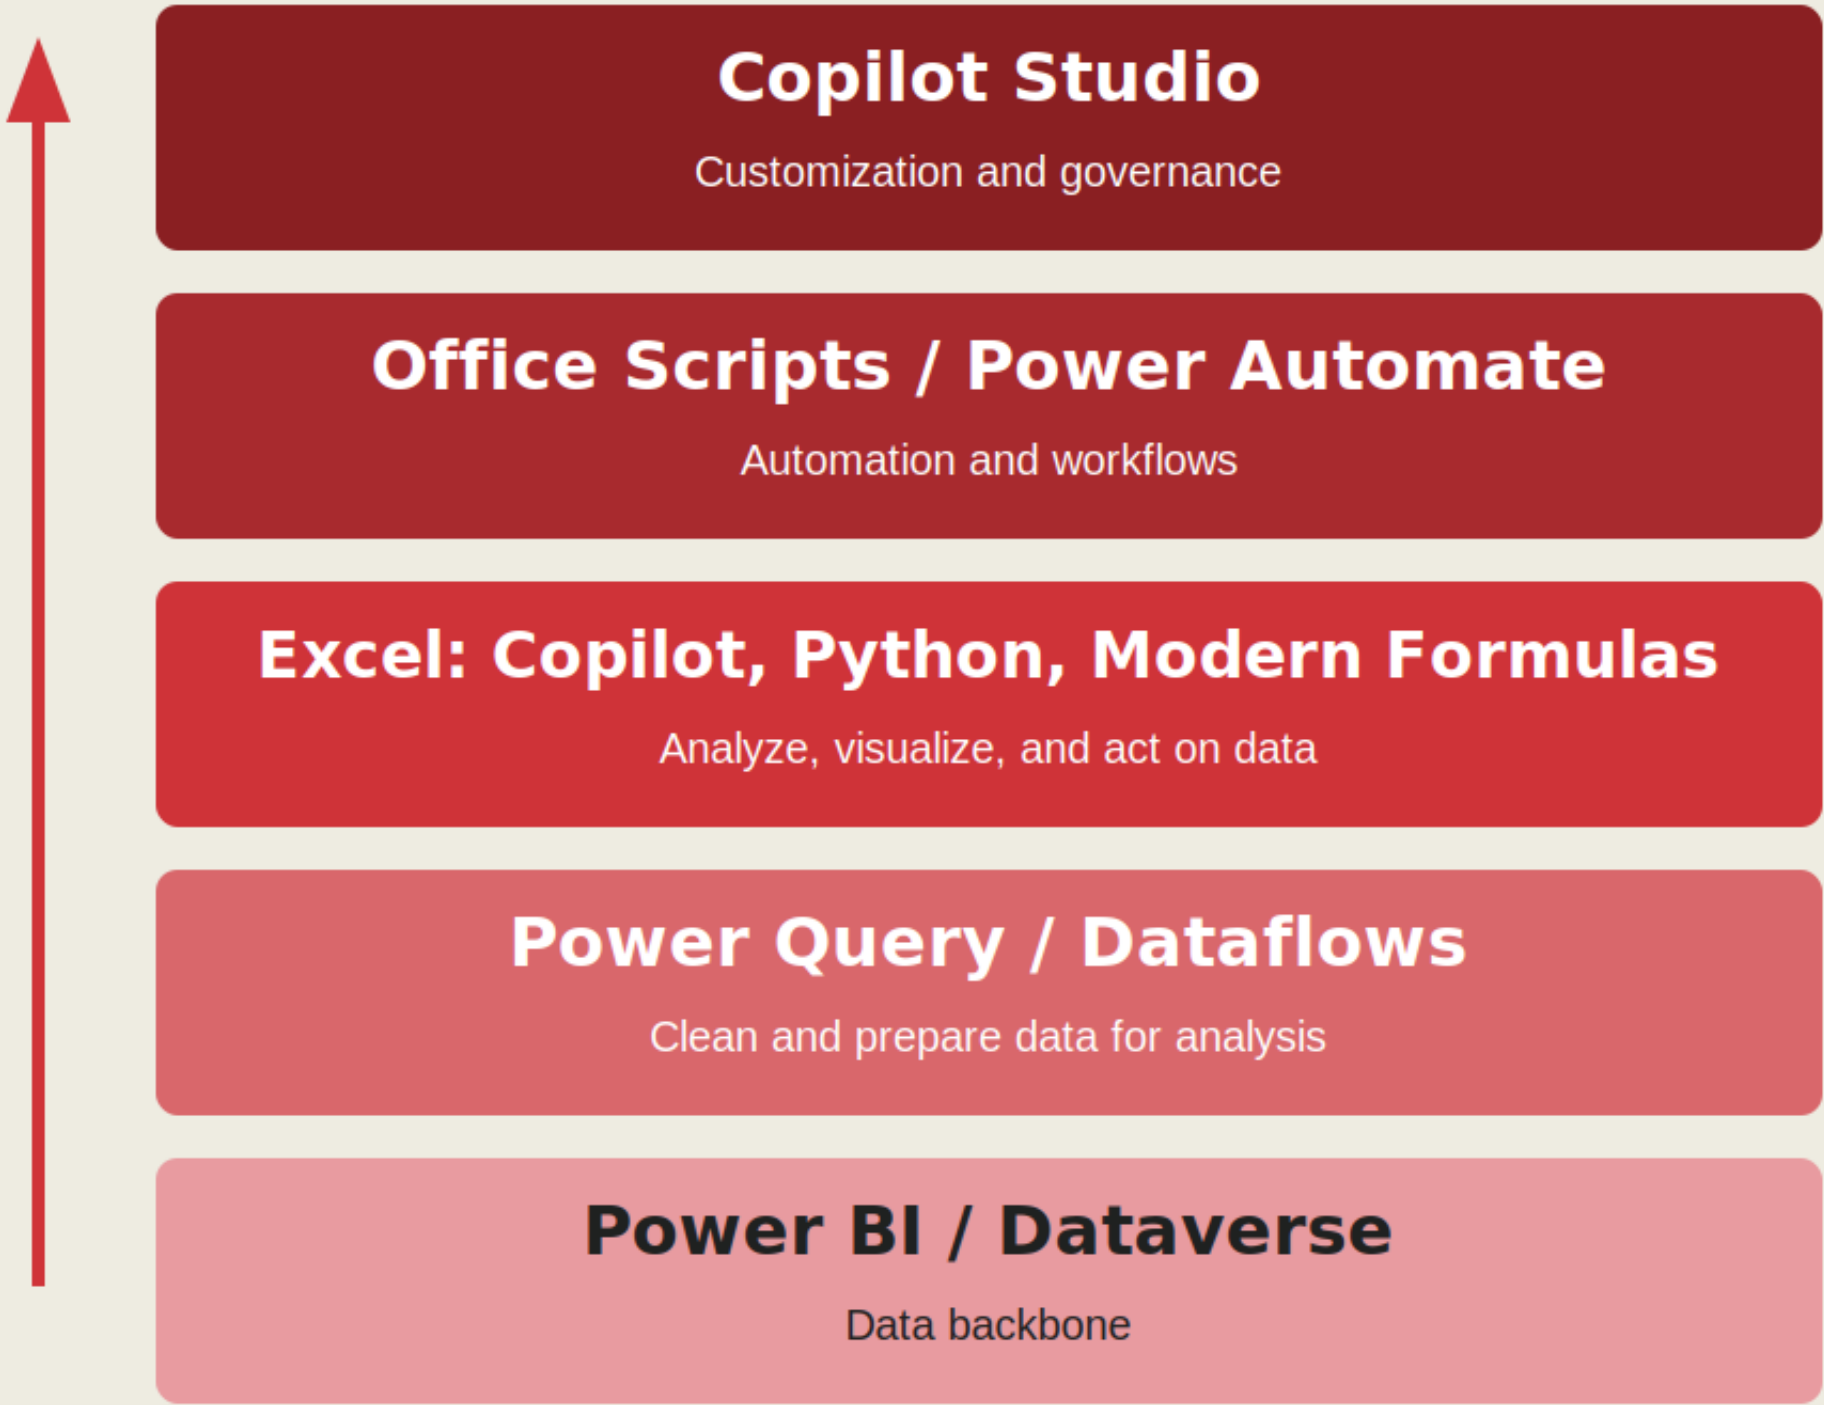

Do you know the right answer?

WHAT WE'LL DEMO LIVE

Five layers. One modern stack.

From data backbone to governance — see how each layer fits together, and where AI actually belongs.

KEY TAKEAWAY

Scripts vs. Prompts

Know when you need a guaranteed answer and when a helpful suggestion is enough.
Pick the right tool every time.

Deterministic

Same input → same output

- Power Query
- Office Scripts
- Formulas

Use when it must be right.

Probabilistic

Same input → different output

- Copilot
- ChatGPT
- LLM prompts

Use to explore and draft.

WHO THIS IS FOR

Built for finance & accounting.

Analysts

Exploring Copilot, Power Query, or AI automation

Controllers & managers

Evaluating where AI fits in month-end and close

Team leads

Setting guardrails for AI use across the team

Excel power users

Tired of the hype — wanting to see what works
